High-Speed Door **NOVOSPRINT® Mono**

BUTZBACH
DOORS+FAÇADES

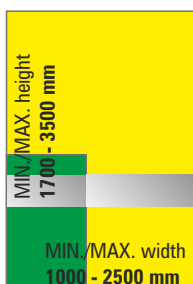

NOVOSPRINT Mono is a high speed door with lateral rolling up of the fabric on one side, specially designed for a **fast, unobstructed and contactless traffic**.

NOVOSPRINT Mono is the ideal solution for **narrow corridors** or in case of **restricted space conditions**.

NOVOSPRINT Mono is a **competitive alternative** to the double leaf version, especially for **reduced door sizes**.

NOVOSPRINT Mono Hygiene in stainless steel has been designed in accordance with hygiene requirements in the food and pharma industry.

- **"Disappearing leaf effect"**: Ideal for corridors where a door shall be placed in the clear width, without space at the sides.
- **Minimum space requirements**: Only compact projecting parts on the closing side of the corridor
- **Advantage compared to hinged or sliding doors**: No disturbing pivoting range or fixed leaf
- **Sideward opening**: total height open immediately
- **Efficient protection** against draught or heat loss
- **Access control possible** with transponder
- **Very high opening speed**
- **Comprehensive safety relevant equipment**
- **Optional hygiene version**
- ***Springs with warranty 500000 openings**: An investment which pays well

The high speed door can be adapted in size in millimetric accuracy.
