

READY, STEADY, GO!

**An organisation system
for increased profit**

Get organised™

TIME

We understand the importance of time and its direct connection to profit. After examining various types of businesses in the manufacturing market we have mapped out the differences, similarities and success factors for efficient and cost effective tool management. Those factors became the foundation of our Ready, Steady, Go! system.

INCREASE YOUR EFFICIENCY

You will know where every tool is. Always. This increases your efficiency in each task you meet, which leads to a higher production rate. The system brings everything into order by arranging your workplace into three fundamental zones.

READY

The Ready zone contains your basic range of tools that you can lean on, but that you rarely use. It can be tools you use once a week, once a month or once a year, but as soon as you need them for your current task, you move them up to the Steady zone.

STEADY

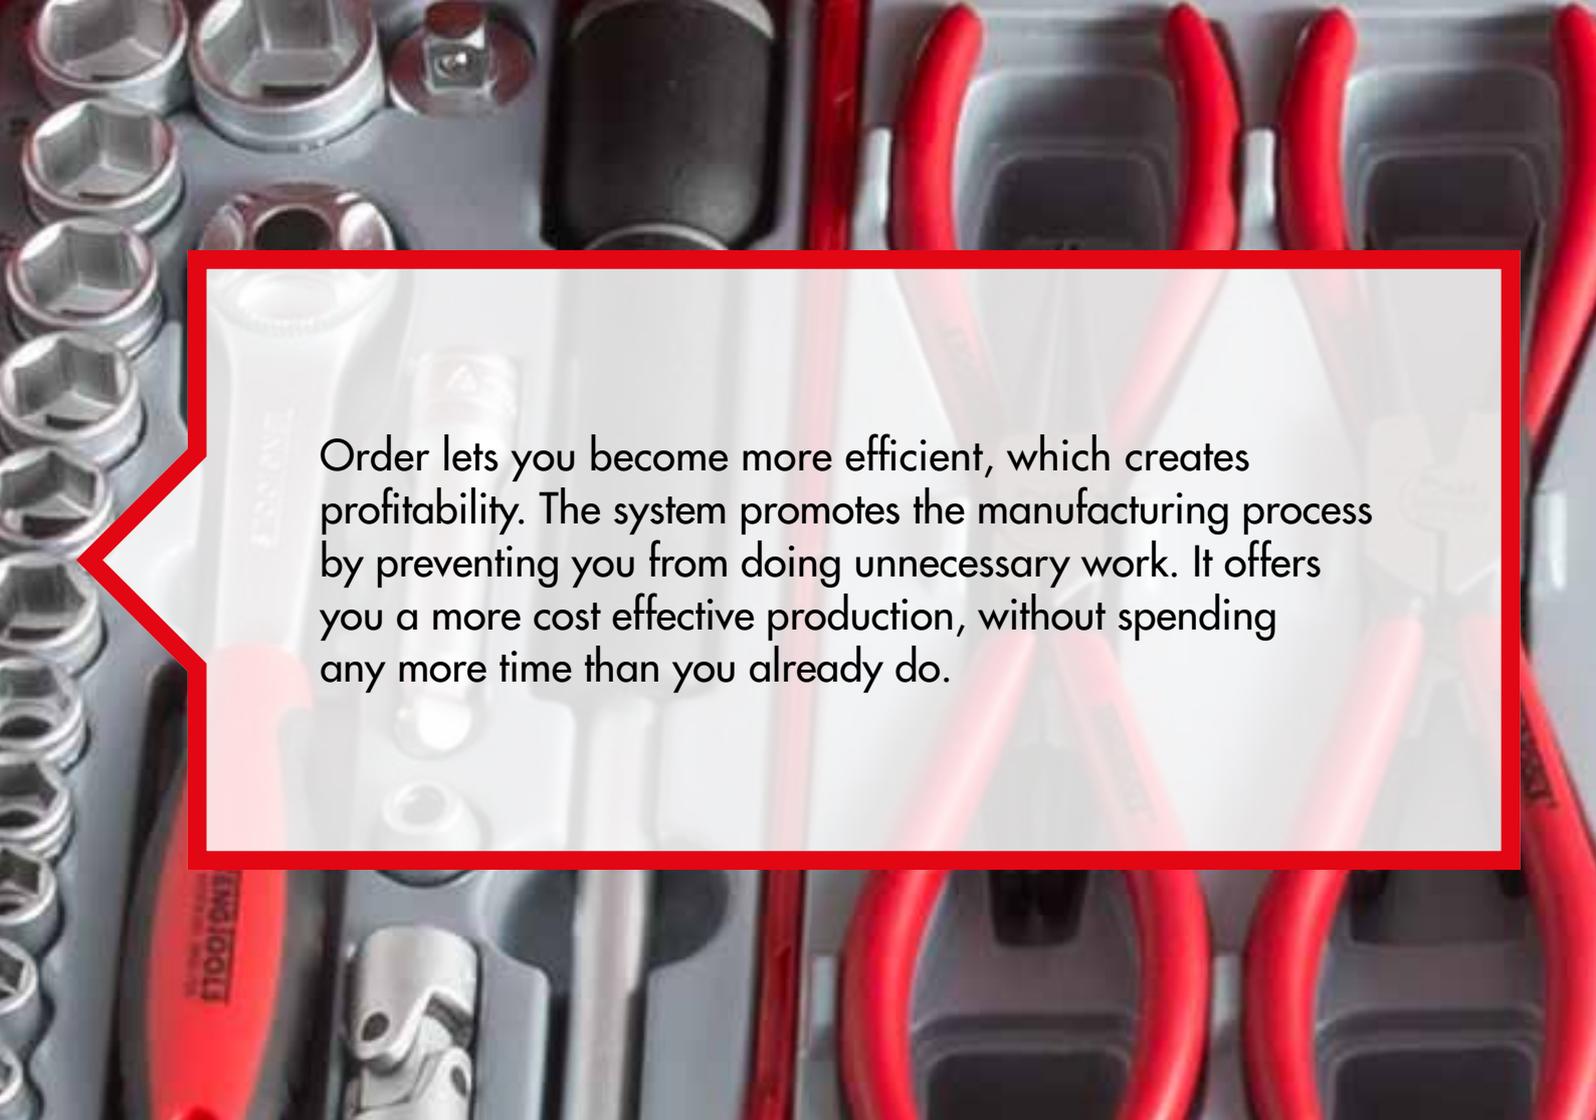

The Steady zone contains the range of personally selected tools that you use every day. It can be in the form of a tool board, a roller cabinet or a similar product. It needs to be closely located to your Go zone to make the collecting and returning of tools more effective.

GO

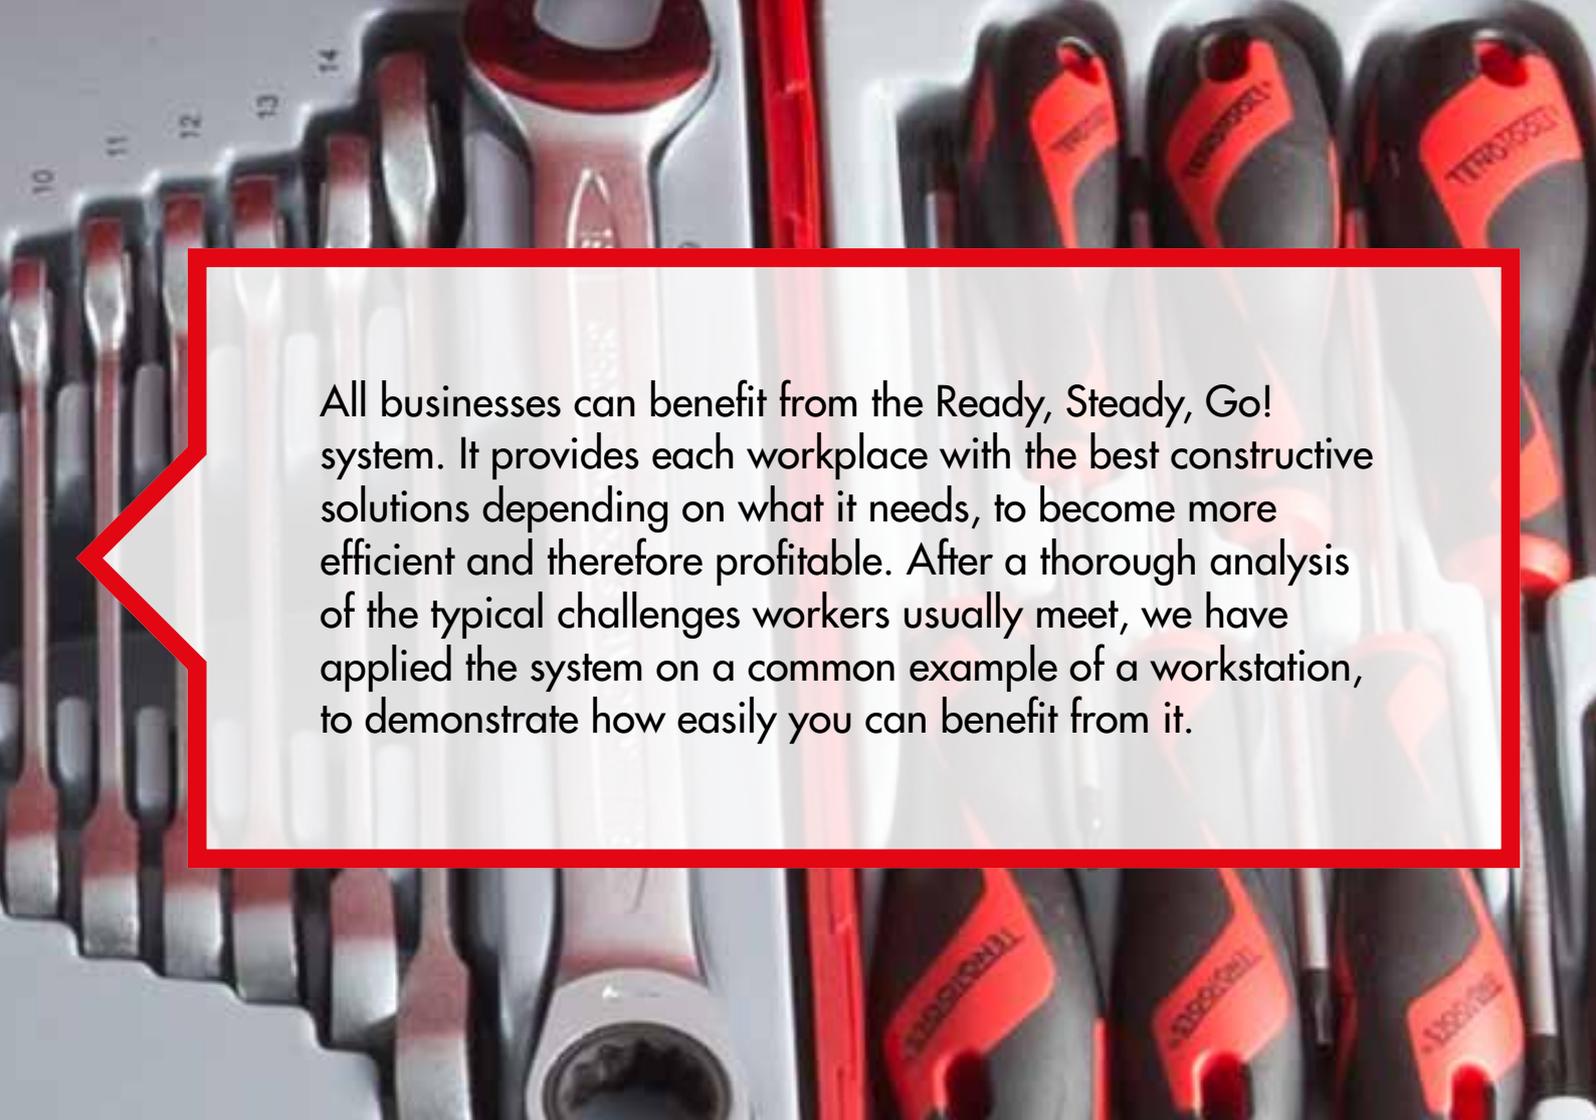

The Go zone is where you perform the actual work. You need the right space and equipment that lets you perform at your best. It is vital for the tools to be in order when you move between work activities, because lost tools equals lower production rate.

**EFFICIENCY
CREATES
PROFITABILITY**

A collection of tools including sockets, wrenches, and pliers in a grey tray. A red-bordered callout box is overlaid on the image, containing text. The tools are arranged in rows, with sockets on the left and pliers on the right. The background is a close-up of the tools, showing their metallic surfaces and red handles.

Order lets you become more efficient, which creates profitability. The system promotes the manufacturing process by preventing you from doing unnecessary work. It offers you a more cost effective production, without spending any more time than you already do.

**PROFITABLE
BENEFITS**

A collection of tools including wrenches and screwdrivers in a kit, with a red-bordered text box overlaid. The tools are arranged in rows, with some labeled with numbers like 10, 11, 12, 13, and 14. The screwdrivers have red and black handles with the brand name 'TETROSOFT' visible. The text box is a white rectangle with a red border and a red arrow pointing to the left.

All businesses can benefit from the Ready, Steady, Go! system. It provides each workplace with the best constructive solutions depending on what it needs, to become more efficient and therefore profitable. After a thorough analysis of the typical challenges workers usually meet, we have applied the system on a common example of a workstation, to demonstrate how easily you can benefit from it.

Several workers use the same cabinet and tools are placed back differently each time.

Without a good system objects get lost and unnecessary time is spent searching for them.

Rarely used but essential tools take up desirable workspace since there is no good storing unit for them.

CHALLENGES IN THE WORKSTATION

Tools get collected in multiple rounds since there is no suitable mobile solution.

Items get spread out and dislocated due to the absence of a natural collection point close to the work zone.

THE READY, STEADY, GO! SOLUTION

READY

The Teng Tools Tool Storage System provides you with a specific place for every tool and a clear overview – making collecting and returning more effective. Fill it with the tool sets that you need for your specific work place, and move your rarely used tools from the Steady zone and arrange them in the drawers. These solutions make you more productive and cost efficient since you can spend all your time on your current task, instead of searching for needed objects.

STEADY

After moving rarely used tools into the Tool Storage System, the Steady zone is now clear and ready for usage. It only contains tools that are used frequently and therefore facilitates the exchanging of equipment. This makes you more effective and able to finish additional tasks per day.

GO

We offer several transport tools that you can use in the Go zone to become more efficient. They let you collect all the items you need from the Ready and Steady zones in one round. Bring the transport tools with you to the Go zone, where they keep the currently needed tools organised – all through every task. They make you execute your job faster by not having to keep track of things or moving back and forth. This makes your work more profitable without spending any more time than you did before.

BENEFITS FOR THE WORKSTATION

**INCREASED
EFFICIENCY**

**COST
EFFECTIVE
EXECUTION**

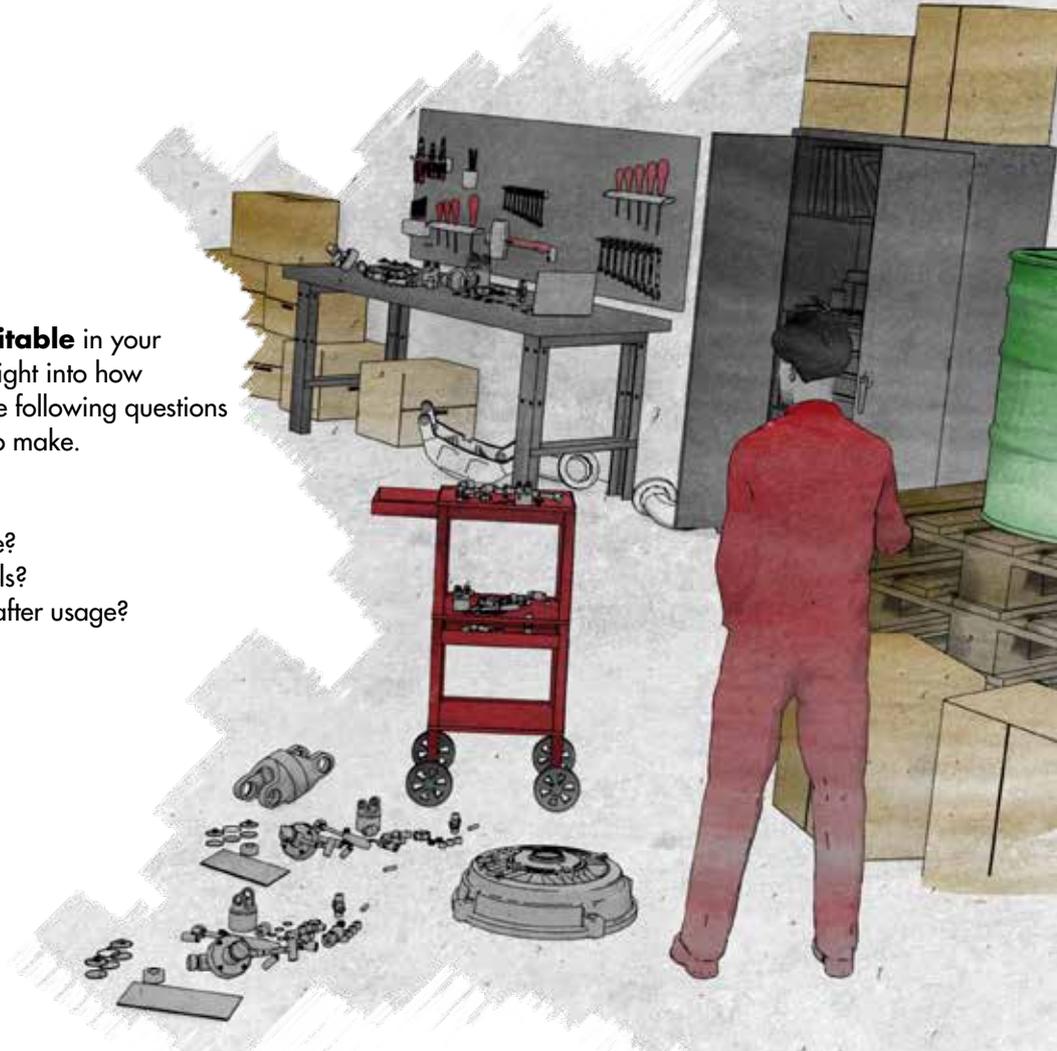

**ADDITIONAL
FINISHED
TASKS
PER DAY**

**USE
READY,
STEADY,
GO!**

**1.
ANALYSE
YOUR
WORKFLOW**

To become more **efficient and profitable** in your workplace, you need to acquire an insight into how you execute your work. Think about the following questions and analyse what changes you need to make.

- Are unnecessary tools lying around?
- Does every tool have a specific place?
- How often do you have to collect tools?
- Where do you put tools before and after usage?

**USE
READY,
STEADY,
GO!**

**2.
SORT
THROUGH**

Once you know how you usually work, you can **start improving your workplace**. You need to do an inventory and get rid of things that takes up space and time that could have been spent on production. Sort through your tools, duplicates, spare parts, fasteners, chemicals, accessories and consumables according to the following questions:

- Are there items that you haven't seen before?
- Are there items that are worn and need to be updated?
- Do you store items that you have no need for?

**USE
READY,
STEADY,
GO!**

**3.
PLAN
YOUR
ZONES**

When you have discarded the tools you don't need, it's time to make a **plan for your workshop**. Here you create a place for every single tool. You use the Ready, Steady, Go! system to divide it into three zones which improve your workflow and therefore raise your production frequency and revenue.

THE READY ZONE

In the Ready zone you are going to place your basic range of tools that you can lean on, but that you rarely use. Here you also store duplicates and large tools. Be sure to have enough space and a specific place for each object. This will accelerate your collecting and returning of tools.

THE STEADY ZONE

In the Steady zone you are going to place the range of tools that you use every day. It should be close to your Go zone to avoid wasting time moving back and forth. You need to have a clear overview and a logical system for these tools.

THE GO ZONE

The Go zone is where you perform the actual work. Here you need to make sure you have enough work surface space and the mobile solutions that you need. You have to be able to create a structure of components during disassembly and have access to tools, liquids and other necessities.

**USE
READY,
STEADY,
GO!**

**4.
UPDATE**

What additions do you need to make to be able to **perform at your best** and receive the **highest conceivable profit**? Go to www.tengtools.com, where you find our complete collection of tools and storage units. Contact your closest distributor to find out more about our Ready, Steady, Go! solutions and order the products you need.

CHOOSE STORAGE

We offer several different tool storage units. Choose the ones that suit your specific needs from a range including tool trays, roller cabinets, tool boxes and service cases.

CHOOSE TOOLS

Our tools come in more than 120 versions of TT-sets, designed to interlock with each other. Choose the ones you need and place them in the storage units. You can also order separate tools if you need to make a minor update.

**STEADY
ZONE**

**READY
ZONE**

**GO
ZONE**

EVERLASTING POWER GUARANTEE

Every tool from Teng Tools comes with an everlasting power guarantee. We undertake to exchange or repair the item if it should ever fail or break under normal working conditions due to faulty workmanship or material.

THE BENEFITS AWAITS YOU

- Increased work efficiency creates profitability.
- Order generates a more secure workplace with a natural workflow.
- Constructive solutions let you perform at your best.
- Higher production frequency leads to additional finished tasks per day.
- Cost effective execution brings you the highest conceivable revenue.
